Dear Charlie:

As you know, Arkady Shevchenko's book Breaking With Moscow is an international best seller, and one of our most effective public diplomacy weapons. The Russian-language edition of this book was published by Liberty Publishing House, whose President is Ilya Levkov. Levkov recently told me that he is trying to persuade the USIA that Breaking With Moscow should be in every U.S. facility throughout the world. He believes that Soviet bloc diplomats regularly acquire reading material from U.S. information offices. If this is true, I would urge you to purchase and distribute as many copies of this book as possible. It could well encourage the defection of others who might provide vital intelligence.

Sincerely,

  
 William W. Geimer
